# Collaboration success.

The success of this platform is its simplicity of use, with all of the essential collaboration and knowledge sharing tools built-in and ready to use. Its services are the result of many years of development, based on real user feedback, and now help 150,000+ members and 5,000+ organisations connect and collaborate across 80 countries. Everyday our national, regional and local government partners are using it to support collaboration initiatives in the areas of health, policing, policy and local service. Use cases include...

- Health care
- Voluntary services
- Housing
- Digital projects
- Social care
- Transport
- Benefits
- Technology
- Environment
- Police & Fire
- Foster care
- National policy
- Flood defence
- Education
- Community services
- Regional initiatives

Consistently rated by Gartner as a Magic Quadrant Leader, the modular, open source technology on which this platform is built is designed to be easy to use, integrate and change, freeing it from the constraints of proprietary platforms. This makes it more accessible to users across boundaries of geography, language, organisations and systems.
