# Design your own place around a more connected experience.

Your platform, your way.

Digital Place – the open digital experience platform for Connected Government

Digital Place is the fastest way to connect and grow your own digital ecosystem and bring your place-based strategies to life. Make quick progress with pre-built services and forms, and add new services whenever you wish. Your open digital platform contains rich features such as integrated website content management, user accounts, personalisation, case management and community collaboration, plus a wide range of services co-developed with leading government organisations. Now it's easy to connect your information and services together in one place, with a consistent digital experience across every device.

Your Connected Digital Place

ENGAGE COMMUNITIES & BUSINESS

SMART BUILDINGS

SMART GOV

SMART ECONOMY

SMART SOCIETY

SMART MOBILITY

SMART ENVIRONMENT

INTEGRATE TECHNOLOGY & DATA

Open Digital Platform

CONNECTED GOVERNMENT
• Great digital experiences • Services launched quickly
• Toolkit to build new digital services • Open source

CONNECTED ECONOMY
• Advertising & notifications • Business directories
• Networking & messaging • Forums, events & blogs

CONNECTED ENVIRONMENT
• Policies & reports • Documents & media libraries
• Co-development groups • Blogs, wikis, ideas & polls

CONNECTED SOCIETY
• Community groups • Community chat & messaging
• Public documents & libraries • Community building

CONNECTED DATA
• Open data standards • Data collection (devices)
• Data aggregation • Data analytics

CONNECTED TECHNOLOGY
• Digital experience platform (DXP) • Open standards
• Scalable ecosystem • Ease of legacy integration
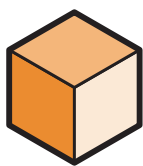

Design Your Own Digital Place.

To succeed as leaders in local democracy and public service, you need the ability to create new digital services quickly, incrementally and at low cost. This means you must have...
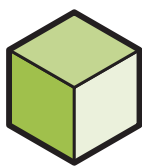

- Control of digital development in achievable outcome-producing stages
- A way to prototype quickly and test digital solutions by engaging users earlier in design
- Enhanced capability to solve local business problems and create digital applications quickly
- Freedom from inflexible suppliers for whom change is difficult, costly and slow
- Open standards and independence from proprietary software that creates vendor 'lock in'
- Ease of integration across technologies and with legacy systems so they don't block progress
- Flexibility to buy and mix together fit-for-purpose solutions from a variety of providers
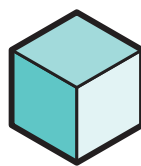

Foundations For Your Digital Place
